# ILLUSTRATION OF AN ASSUMED 15 YEAR INVESTMENT OF \$10,000 (unaudited)

Investment income dividends and capital gains distributions are taken in additional shares. This chart covers the years 1990–2004. Fees for the reinvestment of interim dividends are assumed as 2% of the amount reinvested (maximum of \$2.50) and commissions of \$0.05 per share. There is no charge for reinvestment of year-end distributions. No adjustment has been made for any income taxes payable by stockholders on income dividends or on capital gains distributions or the sale of any shares. These results should not be considered representative of the dividend income or capital gain or loss which may be realized in the future.

For the third consecutive year, the major energy indices outperformed the Dow Jones Industrial Average and the S&P 500 Index. In this annual report we share with you our performance for the past year and provide our current perspective on the energy markets.

#### THE YEAR IN REVIEW

#### Performance

Petroleum & Resources outperformed both the S&P 500 Index and the Dow Jones Industrial Average in 2004. Most of the investments in the Fund benefited from the surging demand and price environment for oil and gas. The return on net assets, including income and capital gains distributions for the calendar year, was an exceptional 23.3%, far surpassing the 10.9% return for the S&P 500 and the 5.3% return of the Dow Industrials. On a market value basis, the Fund's return was 14.4%. Strong supply/demand dynamics and the geopolitical turmoil in major oil-producing countries continued to drive oil and gas equities. Our cash position, non-energy holdings, and our positions in international companies not included in the Index caused us to lag the Dow Jones Energy Index for the entire year. Through December 17, 2004, the Fund's total return was 22.2% compared to the Energy Index's 28.3%. On December 20, Dow Jones discontinued publishing the Energy Index and established a new Oil and Gas Index in its place, with no representation of coal companies. For comparative purposes, in the remainder of this letter references to annual returns of the sectors of the Fund and the Dow Jones Energy Index will be for the year through December 17.

Following a strong rebound in the fourth quarter of 2003, energy stocks continued to outperform in 2004. The first quarter witnessed an increase in the Petroleum & Resources portfolio of 3.3% compared to a 1.7% rise in the S&P and a modest decline in the Dow Jones Industrial Average. Benefiting from the perception of supply constraints in the market and the drilling programs of the oil companies, oil service and equipment companies in our portfolio gained 16% in the quarter, besting the 13% return of the service subsector of the Dow Jones Energy Index. Within the Energy Index, the stronger performance shifted to exploration and production companies during the second quarter, providing a return of 13%. Strong demand and apparent supply constraints biased the stocks upward through the third quarter of the year. The hurricane season pressured an already tight supply/demand balance and drove energy prices higher in the second half of the year, with commodity prices peaking in October. Equity prices in general reflected the commodity move upward, but to a lesser degree. Companies focused primarily on finding and developing oil and gas reserves, however, experienced stock movements

greater than the commodity prices. Our holdings in Amerada Hess, Burlington Resources and Devon each gained more than 57%. The larger, more diversified oil companies returned 21.8% during the same time period, with Exxon Mobil, ChevronTexaco and BP delivering the best performance of the international oil stocks in our portfolio. Our investments in the underperforming equities of Royal Dutch/Shell, which are not included in the Energy Index, were a significant drag on the portfolio's performance. Coal prices and stocks also rose during the year, reflecting rising demand and a strong pricing environment.

Pipelines continued to recover financially in 2004, resulting in a 21.7% increase in the pipeline stocks in the Energy Index and a 65% increase in our pipeline holdings. Utilities also participated in the move as their index rose 20.2% during the year and our holdings, led by utilities with exploration and production exposure, increased 22%. The final month of the year witnessed a correction in oil and gas prices. During December, energy stocks underperformed the general market due to an oil price decline of 11% and a 19% price correction in natural gas. Warm weather and sizable crude and product inventories tempered enthusiasm for oil and gas stocks as 2004 drew to a close. While increasing during the year, our chemical and paper holdings delivered returns lower than those provided by energy stocks. The materials sector of our portfolio gained 9% and industrial stocks, led by General Electric, returned 19%.

#### Oil Industry

At year-end 2003, our outlook for 2004 was for oil prices to settle in the upper end of the \$22-\$28 range and perhaps to correct more as OPEC production increased. This estimate seemed lofty at the time but was justified by low inventories and rising worldwide demand. However, tight crude and product inventories, stronger than anticipated demand, especially from China, and a large speculative market all conspired to drive oil prices higher than we and most other analysts anticipated. The actual average price realization in 2004 for oil was \$41.25 per barrel.

The year was characterized by volatility and extremes. The early months of the year saw a trading range for crude oil of \$32-\$36 per barrel due to a tight crude oil market, low inventories and the OPEC resolution to lower its production quota. Demand both in China and in the U.S. gasoline market influenced the upward move in oil prices. Unrest in Iraq and other countries such as Nigeria, Venezuela and Saudi Arabia contributed to the speculative component of the crude price.

As the year progressed, OPEC increased the quota three times, to a level of 27 million barrels per day by November. Production levels exceeded quotas for most of the year but record prices for crude and gasoline

continued. The low U.S. crude inventories were not replenished early in the year and the severe hurricane season exacerbated the domestic crude supply problem. Hurricanes Charley, Frances and Ivan inflicted severe damage on the Gulf Coast and caused major delays in oil shipments and the temporary shutdown of refineries. While the oil production losses along the coast were minimal, the incremental disruption to supply only brought more pressure to bear on the markets. Compounding the hurricane season's effect was the news that Russia's biggest oil-exporting company, Yukos, might be forced to halt operations due to tax debts. The tight oil markets could not absorb the potential Yukos loss, as it supplied 2% of the world market. By the final quarter of the year, these new pressures, added to strong demand, the uncertain flow of oil exports from Iraq, Venezuelan political instability and a Nigerian labor strike all converged on the markets. The benchmark for U.S. crude, West Texas Intermediate, soared to \$55 per barrel on October 22. Since that peak, higher OPEC output, warm East Coast weather, and the return to production of a large portion of the Gulf of Mexico combined to replenish U.S. crude oil inventories. Prices corrected and ended the year at \$42.15 per barrel, 33% higher than the start of the year. Petroleum product prices such as gasoline also set record prices and, despite the decline in December, ended the year 20% higher than at the beginning of the year.

#### **Natural Gas and Coal**

Natural gas prices increased during 2004 but to a much lesser extent than crude and averaged \$5.89 per thousand cubic feet for the year, or a 10% increase over the prior year. Prices spiked early in the year as cold weather and expectations for strong industrial demand prevailed. Helped by crude oil prices, natural gas sustained mid \$5 per thousand cubic feet pricing despite weather not being much of a factor and healthy inventory levels as the winter heating season ended. Long term concern regarding U.S. natural gas production continues to be reflected in pricing. The domestic industry has not experienced incremental production increases in recent years despite active drilling programs. The marginal cost to produce natural gas rose during 2004, reflecting the continued maturation of the North American producing base. Liquefied natural gas (LNG) imports, though still representing less than 2% of U.S. gas demand, increased during the year. Natural gas pricing drifted lower during the early summer months until the frequency and severity of hurricanes curtailed output in the Gulf of Mexico. Since approximately 30% of North American gas production is from the Gulf Region, the hurricane-related shutdowns had an immediate impact. While most of the lost production was temporary, the concern over the lack of spare

production capacity was heightened. Prices remained strong into the beginning of the heating season and closed the year just over \$6 per thousand cubic feet. Coal prices increased again in 2004, with spot prices almost double those of 2002. Improved supply/demand conditions in key producing regions led to the increases both in spot and contract prices, especially in the Northern and Central Appalachian basins.

#### INVESTMENT RESULTS

Net assets of the Corporation on December 31, 2004 were \$618,887,401 or \$28.16 per share on 21,979,676 shares outstanding. This compares with \$522,941,279 or \$24.06 per share on 21,736,777 shares outstanding a year earlier.

Net investment income for 2004 was \$8,924,453 compared to \$8,134,186 for 2003. These earnings are equivalent to \$0.41 and \$0.38 per share, respectively, on the average number of shares outstanding throughout each year. In 2004, our 0.56% expense ratio (expenses to average net assets) was once again at a low level compared to the industry.

Net realized gains amounted to \$18,979,327 during the year, while the unrealized appreciation on investments increased from \$185,072,550 at December 31, 2003 to \$275,422,891 at year end, a 49% increase.

#### **DIVIDENDS AND DISTRIBUTIONS**

Total dividends and distributions paid in 2004 were \$1.32 per share compared to \$1.19 in 2003. As announced on November 13, 2004, a year-end distribution consisting of investment income of \$0.14 and capital gains of \$0.79 was made on December 27, 2004, both realized and taxable in 2004. On January 13, 2005, an additional distribution of \$0.13 per share was declared payable March 1, 2005, representing the balance of undistributed net investment income and capital gains earned in 2004 and an initial distribution from 2005 net investment income, all taxable to shareholders in 2005.

#### OUTLOOK FOR 2005

# Crude Oil

The relentless rise in commodity prices, particularly oil and gas, has contributed to strong stock performance in the energy industry for the past three years. Many of the factors that contributed to the rise in prices are still in effect. However, the initial move in crude prices in 2005 was a \$3 decline as inventories were high and weather, especially in the Northeast, was warm, resulting in less use of home heating fuels. OPEC (excluding Iraq) entered the year promising to curtail production to prevent significant inventory builds. The organization will meet early in the year to

determine the appropriate quota necessary to maintain a desired price level. While the official price range is lower, it is believed that a U.S. price below \$40 will trigger a quota reduction. Supply from Russia and the changes within Yukos and the Russian government will influence worldwide supply. Supply changes due to conflicts and disruptions in the Middle East, Nigeria and Venezuela cannot currently be quantified but the premium to normalized oil prices resulting from the uncertainty will remain. Worldwide demand growth is expected to remain strong. China accounted for 40% of the incremental demand last year and the sustainability of growth in China, as well as India and other growth markets, is crucial to supporting high oil prices. Current robust demand and the lack of increases in productive capacity, combined with the unknown geopolitical issues, contribute to a strong price outlook. U.S. demand remains strong despite the jump in crude and gasoline prices. However, a slowdown in China is likely, especially in the second half of 2005, and OPEC's compliance with its quotas may again set the price. Our 2005 outlook for oil prices is a wide range of \$35-\$40 for the year. If Saudi Arabia defends the market coincident with terrorist threats and other supply disruptions threatening the supply/demand balance, the near term floor price is likely to be \$30 per barrel, a figure which used to be considered high.

#### **Natural Gas and Coal**

Prices for natural gas early in the year will be significantly influenced by weather. Inventories are abundant and the absence of cold weather in the Northeast is creating pressure on the commodity. One year ago, natural gas prices were approximately \$1 lower and the weather was much colder, reflecting the correlation to crude oil pricing. The lack of new sources of gas entering the supply stream and rising costs for developing new supplies provide support for current prices. Exploration and production companies will continue to spend for new reserves at the same time the larger integrated companies are concentrating on LNG projects. Over the next year, natural gas volumes and pricing will vary with crude prices, weather and inventory levels. Our estimate is for a slightly lower gas price this year, dropping to \$5.75 for an average as compared to \$5.89 for 2004. An anticipated pickup in industrial demand should offset lower weather-related demand. Coal prices should remain strong throughout the year as prices reflect strong demand. Underinvestment in coal facilities as well as complex permitting procedures slowed the investment in reserve development in recent years. The pricing environment will reflect that dynamic as economic growth, especially from the steel industry, pressures prices during the next year. Longer term, the comparative cost advantage of

coal versus oil and gas should provide a strong operating environment for coal.

In anticipation of lower average prices for oil and natural gas, we have reduced our holdings in a number of the exploration and development companies, whose performance is generally more tied to commodity prices. Investments have been redirected to international and domestic integrated companies as well as oil service companies. The large integrated companies should report lesser declines in income due to lower oil prices. The drillers and service companies are expected to continue to benefit from higher levels of exploration activity both domestically and abroad. We have avoided many basic materials stocks due to the volatility of metal and other materials prices. As these begin to stabilize at reasonable levels, there may be opportunities to invest more in the sector.

As noted, investment returns from the energy sector have been exceptional for three years in a row. After a long period of under-appreciation by investors, valuations are now more appropriate given the prospects of the companies. We expect strong earnings from the sector in 2005, barring unforeseen events, and therefore the stocks should perform reasonably well. General market returns are expected to be in the 7-10% range for the year; we anticipate that for the fourth year in a row the energy sector will do as well as, if not better than, the market as a whole.

#### SHARE REPURCHASE PROGRAM

On December 9, 2004, the Board of Directors authorized the repurchase by management of an additional 5% of the outstanding shares of the Corporation over the ensuing year. The repurchase program is subject to the restriction that shares can only be repurchased when the discount of the market price of the shares from the net asset value is 6.5% or greater.

From the beginning of 2005 through January 20, 2005, 13,500 shares have been repurchased under the program.

The proxy statement for the Annual Meeting of Stockholders to be held in Baltimore, Maryland on April 27, 2005, is expected to be mailed on or about March 15, 2005.

By order of the Board of Directors,

Douglas G. Ober,

Chairman, President and Chief Executive Officer

January 21, 2005

#### 1. SIGNIFICANT ACCOUNTING POLICIES

Petroleum & Resources Corporation (the Corporation) is registered under the Investment Company Act of 1940 as a non-diversified investment company. The Corporation's investment objectives as well as the nature and risk of its investment transactions are set forth in the Corporation's registration statement.

\*\*Security Valuation\*\* — Investments in securities traded on national securities exchanges are valued at the last reported sale price on the day of valuation. Over-the-counter and listed securities for which a sale price is

reported sale price on the day of valuation. Over-the-counter and listed securities for which a sale price is not available are valued at the last quoted bid price. Short-term investments (excluding purchased options) are valued at amortized cost. Purchased and written options are valued at the last quoted asked price.

Security Transactions And Investment Income—

Security Transactions And Investment Income — Investment transactions are accounted for on the trade date. Gain or loss on sales of securities and options is determined on the basis of identified cost. Dividend income and distributions to shareholders are recognized on the ex-dividend date, and interest income is recognized on the accrual basis.

#### 2. FEDERAL INCOME TAXES

The Corporation's policy is to distribute all of its taxable income to its shareholders in compliance with the requirements of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. For federal income tax purposes, the identified cost of securities at December 31, 2004 was \$372,148,846, and net unrealized appreciation aggregated \$275,649,014, of which the related gross unrealized appreciation and depreciation were \$283,381,833 and \$7,732,819, respectively. As of December 31, 2004, the tax basis of distributable earnings was \$1,031,243 of undistributed ordinary income and \$1,296,861 of undistributed long-term capital gain. Distributions paid by the Corporation during the year ended December 31, 2004 were classified as ordinary income of \$9,971,538 and capital gain of \$18,602,737. In comparison, distributions paid by the Corporation during the year ended December 31, 2003 were classified as ordinary income of \$8,321,192 and capital gain of \$17,048,026. The distributions are determined in accordance with income tax regulations which may differ from generally accepted accounting principles. Accordingly, periodic reclassifications are made within the Corporation's capital accounts to reflect income and gains available for distribution under income tax regulations.

# 3. INVESTMENT TRANSACTIONS

The Corporation's investment decisions are made by a committee, and no one person is primarily responsible for making recommendations to that committee.

Purchases and sales of portfolio securities, other than options and short-term investments, during the year

ended December 31, 2004 were \$72,588,871 and \$67,947,551, respectively. Options may be written (sold) or purchased by the Corporation. The Corporation, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option. The risk associated with purchasing an option is limited to the premium originally paid. A schedule of outstanding option contracts as of December 31, 2004 can be found on page 16.

Transactions in written covered call and collateralized put options during the year ended December 31, 2004 were as follows:

	Covered Calls		Collateralized Puts	
	Contracts	Premiums	Contracts	Premiums
Options outstanding,				
December 31, 2003	550	\$ 62,932	350	\$ 36,992
Options written	4,765	609,394	3,677	429,651
Options terminated in closing purchase				
transactions	(600)	(79,048)	(70)	(10,990)
Options expired	(1,940)	(220,157)	(2,337)	(272,377)
Options exercised	(1,225)	(168,954)	(150)	(15,993)
Options outstanding, December 31, 2004	1,550	\$ 204,167	1,470	\$ 167,283

#### 4. CAPITAL STOCK

The Corporation has 5,000,000 authorized and unissued preferred shares without par value.

On December 27, 2003, the Corporation issued 450,110 shares of its Common Stock at a price of \$21.735 per share (the average market price on December 8, 2003) to stockholders of record November 24, 2003 who elected to take stock in payment of the distribution from 2003 capital gain and investment income.

On December 27, 2004, the Corporation issued 380,149 shares of its Common Stock at a price of \$25.33 per share (the average market price on December 13, 2004) to stockholders of record November 23, 2004 who elected to take stock in payment of the distribution from 2004 capital gain and investment income.

The Corporation may purchase shares of its Common Stock from time to time at such prices and amounts as the Board of Directors may deem advisable.

Transactions in Common Stock for 2004 and 2003 were as follows:

	Shares		Amo	ount	
	2004	2003	2004	2003	
Shares issued in payment of distributions Shares purchased	380,149	450,110	\$ 9,629,174	\$ 9,783,141	
(at an average discount from net asset value of 8.0% and 8.2%,	(127.250)	(222, 400)	(2.2(2.900)	(4 202 215)	
respectively)	(137,250)	(223,400)	(3,362,898)	(4,393,315)	
Net change	242,899	226,710	\$ 6,266,276	\$ 5,389,826	

The Corporation has an employee incentive stock option and stock appreciation rights plan which provides for the issuance of options and stock appreciation rights for the purchase of up to 895,522 shares of the Corporation's Common Stock at 100% of the fair market value at date of grant. Options are exercisable beginning not less than one year after the date of grant and extend and vest over ten years from the date of grant. Stock appreciation rights are exercisable beginning not less than two years after the date of grant and extend over the period during which the option is exercisable. The stock appreciation rights allow the holders to surrender their rights to exercise their options and receive cash or shares in an amount equal to the difference between the option price and the fair market value of the common stock at the date of surrender.

Under the plan, the exercise price of the options and related stock appreciation rights is reduced by the per share amount of capital gain paid by the Corporation during subsequent years. At the beginning of 2004, there were 129,447 options outstanding with a weighted average exercise price of \$18.35 per share. During 2004, the Corporation granted options, including stock appreciation rights, for 19,241 shares of Common Stock with an original weighted average exercise price of \$22.86 per share. During the year, stock appreciation rights relating to 20,145 stock option shares were exercised at a weighted average market price of \$25.31 per share and the stock options relating to these rights which had a weighted average exercise price of \$13.00 per share were cancelled. At December 31, 2004, there were outstanding exercisable options to purchase 42,060 common shares at \$10.04-\$23.65 per share (weighted average price of \$18.25) and unexercisable options to purchase 86,483 common shares at \$14.26-\$23.65 per share (weighted average price of \$19.08). The weighted average remaining contractual life of outstanding exercisable and unexercisable options was 5.32 years and 6.18 years, respectively. The total compensation expense recognized in 2004 for the stock option and stock appreciation rights plan was \$435,091. At December 31, 2004, there were 260,373 shares available for future option grants.

In December 2004, the Financial Accounting Standards Board revised the Statement of Financial Accounting Standards No. 123, *Share-Based Payment* which establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments.

Currently, the Corporation recognizes compensation cost for a stock option award over the award's vesting period. The revised FAS 123 is effective as of the beginning of the first interim or annual reporting period that begins after June 15, 2005. The Corporation is currently evaluating the impact it will have on its operations and financial statements.

#### 5. RETIREMENT PLANS

The Corporation provides retirement benefits for its employees under a non-contributory qualified defined benefit pension plan and a non-contributory non-qualified defined benefit pension plan. The benefits are based on years of service and compensation during the last five years of employment.

The Corporation uses a December 31 measurement date for its plans.

	2004	2003
Change in benefit obligation		
Benefit obligation at beginning of year	\$ 3,989,256	\$ 4,675,724
Service cost	137,080	141,454
Interest cost	245,422	269,838
Actuarial loss	270,897	481,246
Benefits paid	(123,287)	(1,579,006
Benefit obligation at end of year	\$ 4,519,368	\$ 3,989,256
Change in plan assets		
Fair value of plan assets at beginning of year	\$ 2,749,114	\$ 3,861,986
Actual return on plan assets	243,186	427,261
Employer contribution	636,675	38,873
Benefits Paid	(123,287)	(1,579,006)
Fair value of plan assets at end of year	\$ 3,505,688	\$ 2,749,114
Funded status	\$(1,013,680)	\$(1,240,142
Unrecognized net loss	1,332,884	1,221,107
Unrecognized prior service cost	178,830	236,681
Net amount recognized	\$ 498,034	\$ 217,646

Amounts recognized in the statement of assets and liabilities consist of:

	2004	2003
Prepaid pension cost	\$ 985,707	\$ 731,021
Accrued pension cost	(487,673)	(513,375)
Net amount recognized	\$ 498,034	\$ 217,646

The accumulated benefit obligation for all defined benefit pension plans was \$3,533,866 and \$3,055,084 at December 31, 2004, and 2003, respectively.

	2004	2003
Components of net periodic pension cost		
Service cost	\$ 137,080	\$ 141,454
Interest cost	245,422	269,838
Actual return on plan assets	(243,186)	(427,261)
Amortization of prior service cost	57,851	57,851
Amortization of net loss	132,729	164,748
Deferred asset gain	26,391	192,147
Net periodic pension cost	\$ 356,287	\$ 398,777

Assumptions used to determine benefit obligations and costs are:

	2004	2003
Discount rate	5.75%	6.25%
Expected long-term return on plan assets	8.00%	8.00%
Rate of compensation increase	7.00%	7.00%

The assumption for the expected long-term return on plan assets is based on the actual long-term historical returns realized by the plan assets, weighted according to the current asset mix.

The asset allocations at December 31, 2004 and 2003, by asset category are as follows:

	2004	2003
Asset Category		
Equity Securities & Equity Mutual Funds	71%	74%
Fixed Income Mutual Funds	25%	25%
Cash	4%	1%

Equity securities include Common Stock of The Adams Express Company, the Corporation's non-controlled affiliate, in the amount of \$201,285 (6% of total plan assets) and \$180,012 (7% of total plan assets) at December 31, 2004, and 2003, respectively.

The primary objective of the Corporation's pension plan is to provide capital appreciation, current income, and preservation of capital through a portfolio of stocks and fixed income securities. The equity portion of the portfolio may range from 50% to 75% of total portfolio assets. The fixed income portion of the portfolio may range from 25% to 50% of total portfolio assets and cash may range from 0% to 25% of total portfolio assets. Subject to these allocation ranges, the portfolio may be invested in any of the following securities: common stocks, preferred stocks, American Depository Receipts, foreign securities, mutual funds, convertible securities, municipal bonds, corporate bonds, US government securities and US government agency securities.

The Corporation's policy is to contribute annually to the plans those amounts that can be deducted for federal income tax purposes, plus additional amounts as the Corporation deems appropriate in order to provide assets sufficient to meet benefits to be paid to plan participants. The Corporation anticipates making contributions in the amount of approximately \$630,000 to the plans in 2005.

The following benefit payments, which reflect expected future service, are expected to be paid:

	Pension Benefits
2005	\$ 122,179
2006	191,811
2007	194,682
2008	306,401
2009	299,797
Years 2010-2014	1,592,920

The Corporation also sponsors a defined contribution plan that covers substantially all employees. The Corporation expensed contributions of \$56,822 and \$58,965 for the years ended December 31, 2004 and December 31, 2003, respectively. The Corporation does not provide postretirement medical benefits.

#### 6. EXPENSES

The amount of accrued expenses at December 31, 2004 for employees and former employees of the Corporation was \$1,669,127. Aggregate remuneration paid or accrued during the year ended December 31, 2004 to key employees and directors amounted to \$1,672,549.

#### 7. PORTFOLIO SECURITIES LOANED

The Corporation makes loans of securities to brokers, secured by cash, U.S. Government securities, or bank letters of credit. The Corporation accounts for securities lending transactions as secured financing and receives compensation in the form of fees or retains a portion of interest on the investment of any cash received as collateral. The Corporation also continues to receive interest or dividends on the securities loaned. The loans are secured by collateral of at least 102%, at all times, of the fair value of the securities loaned plus accrued interest. At December 31, 2004, the Corporation had securities on loan of \$27,480,851, and held collateral of \$28,685,423, consisting of a money market fund.

# To the Board of Directors and Stockholders of Petroleum & Resources Corporation:

In our opinion, the accompanying statement of assets and liabilities, including the schedule of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Petroleum & Resources Corporation (hereafter referred to as the "Corporation") at December 31, 2004, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Corporation's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States).

Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2004 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

#### STATEMENT ON QUARTERLY FILING OF COMPLETE PORTFOLIO SCHEDULE

In addition to publishing its complete schedule of portfolio holdings in the First and Third Quarter Reports to shareholders, the Corporation also files its complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year on Form N-Q. The Corporation's Forms N-Q are available on the Commission's website at <a href="https://www.sec.gov">www.sec.gov</a>. The Corporation's Forms N-Q may be reviewed and copied at the Commission's Public Reference Room, and information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330. The Corporation also posts its Forms N-Q on its website at: <a href="https://www.peteres.com">www.peteres.com</a>, under the heading "Financial Reports".

#### ANNUAL CERTIFICATION

The Corporation's CEO has submitted to the New York Stock Exchange the annual CEO certification as required by Section 303A.12(a) of the NYSE Listed Company Manual.

#### PROXY VOTING POLICIES AND RECORD

A description of the policies and procedures that the Corporation uses to determine how to vote proxies relating to portfolio securities owned by the Corporation and information as to how the Corporation voted proxies relating to portfolio securities during the 12 month period ended June 30, 2004 are available (i) without charge, upon request, by calling the Corporation's toll free number at (800) 638-2479; (ii) on the Corporation's website by clicking on "Corporate Information" heading on the website; and (iii) on the Securities and Exchange Commission's website at http://www.sec.gov.

#### FORWARD-LOOKING STATEMENTS

This report contains "forward-looking statements" within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934. By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect the Corporation's actual results are the performance of the portfolio of stocks held by the Corporation, the conditions in the U.S. and international financial, petroleum and other markets, the price at which shares of the Corporation will trade in the public markets, and other factors discussed in the Corporation's periodic filings with the Securities and Exchange Commission.

#### PRIVACY POLICY

In order to conduct its business, Petroleum & Resources Corporation collects and maintains certain nonpublic personal information about our stockholders of record with respect to their transactions in shares of our securities. This information includes the stockholder's address, tax identification or Social Security number, share balances, and dividend elections. We do not collect or maintain personal information about stockholders whose shares of our securities are held in "street name" by a financial institution such as a bank or broker.

We do not disclose any nonpublic personal information about you, our other stockholders or our former stockholders to third parties unless necessary to process a transaction, service an account or as otherwise permitted by law.

To protect your personal information internally, we restrict access to nonpublic personal information about our stockholders to those employees who need to know that information to provide services to our stockholders. We also maintain certain other safeguards to protect your nonpublic personal information.

This report, including the financial statements herein, is transmitted to the stockholders of Petroleum & Resources Corporation for their information. It is not a prospectus, circular or representation intended for use in the purchase or sale of shares of the Corporation or of any securities mentioned in the report. The rates of return will vary and the principal value of an investment will fluctuate. Shares, if sold, may be worth more or less than their original cost. Past performance is not indicative of future investment results.

#### WE ARE OFTEN ASKED —

#### How do I invest in Petroleum & Resources?

Petroleum & Resources Common Stock is listed on the New York Stock Exchange and Pacific Exchange. The stock's ticker symbol is "PEO" and may be bought and sold through registered investment security dealers. Your broker will be able to assist you in this regard. In addition, stock may be purchased through our transfer agent, American Stock Transfer & Trust Company's INVESTORS CHOICE Plan (see page 21).

# Where do I get information on the stock's price, trading and/or net asset value?

The *daily* net asset value (NAV) per share and closing market price may be obtained from our website at www.peteres.com. The daily NAV is also available on the NASDAQ Mutual Fund Quotation System under the symbol XPEOX. The *week-ending* NAV is published on Saturdays in various newspapers and on Mondays in The Wall Street Journal in a table titled "Closed-End Funds." The table compares the net asset value at the close of the week's last business day to the market price of the shares, and shows the amount of the discount or premium.

Petroleum's daily trading is shown in the stock tables of most daily newspapers, usually with the abbreviated form "PetRs." Local newspapers determine, usually by volume of traded shares, which securities to list. If your paper does not carry our listing, please telephone the Corporation at (800) 638-2479 or visit our website.

# How do I replace a lost certificate(s) or how do I correct a spelling error on my certificate?

Your Petroleum stock certificates are valuable documents and should be kept in a safe place. For tax purposes, keep a record of each certificate, including the cost or market value of the shares it covers at the time acquired. If a certificate is lost, destroyed or stolen, notify the transfer agent immediately so a "stop transfer" order can be placed on the records to prevent an unauthorized transfer of your certificate. The necessary forms and requirements to permit the issuance of a

replacement certificate will then be sent to you. A certificate can be replaced only after the receipt of an affidavit regarding the loss accompanied by an open surety bond, for which a small premium is paid by the stockholder.

In the event a certificate is issued with the holder's name incorrectly spelled, a correction can only be made if the certificate is returned to the transfer agent with instructions for correcting the error. Transferring shares to another name also requires that the certificate be forwarded to the transfer agent with the appropriate assignment forms completed and the signature of the registered owner Medallion guaranteed by a bank or member firm of The New York Stock Exchange, Inc.

# Is direct deposit of my dividend checks available?

Yes, our transfer agent offers direct deposit of your interim dividend checks. You can request direct deposit with American Stock Transfer either on-line or by calling them at the phone number provided on page 21. At this time, AST does not offer direct deposit of your year-end distribution checks. We have been advised by AST that it will be able to offer this service for the 2005 year-end distribution.

# Who do I notify of a change of address?

The transfer agent.

# We go to Florida (Arizona) every winter. How do we get our mail from Petroleum & Resources?

The transfer agent can program a seasonal address into its system; simply send the temporary address and the dates you plan to be there to the transfer agent.

# I want to give shares to my children, grandchildren, etc., as a gift. How do I go about it?

Giving shares of Petroleum is simple and is handled through our transfer agent. The stock transfer rules are clear and precise for most forms of transfer. They will vary slightly depending on each transfer, so write to the transfer agent stating the exact intent of your gift plans and the transfer agent will send you the instructions and forms necessary to effect your transfer.

#### DIVIDEND PAYMENT SCHEDULE

The Corporation presently pays dividends four times a year, as follows: (a) three interim distributions on or about March 1, June 1, and September 1 and (b) a "year-end" distribution, payable in late December, consisting of the estimated balance of the net investment income for the year and the net realized capital gain earned through October 31. Stockholders may elect to receive the year-end distribution in stock or cash. In connection with this distribution, all **stockholders of record** are sent a dividend announcement notice and an election card in mid-November.

Stockholders holding shares in "street" or brokerage accounts may make their elections by notifying their brokerage house representative.

# **INVESTORS CHOICE**

INVESTORS CHOICE is a direct stock purchase and sale plan, as well as a dividend reinvestment plan, sponsored and administered by our transfer agent, American Stock Transfer & Trust Company (AST). The plan provides registered stockholders and interested first time investors an affordable alternative for buying, selling, and reinvesting in Petroleum & Resources shares.

The costs to participants in administrative service fees and brokerage commissions for each type of transaction are listed below.

Initial Enrollment and

**Optional Cash Investments** 

Service Fee \$2.50 per investment Brokerage Commission \$0.05 per share

Reinvestment of Dividends\*
